Antamedia DHCP Server Crack+ Free Download Latest

Antamedia DHCP Server is the most advanced DHCP server software, which allows simple setup, easy maintenance, and just-in-time-setup features. It can be used by an individual person, or corporation, and easily administered. With Antamedia DHCP Server, you can turn you computer into the DHCP server of an local area network, or even a wide-area network. With a pre-determined network structure, you can easily manage your connection's DNS, PPP connections, connection status, and more. Your computer will serve as the DHCP server and send out DHCP packets. Besides, Antamedia DHCP Server has various important functions such as User Authentication, User Management, User Access Control, Support for Personal Security, Support for Antivirus Software, Support for Energy Saving Technology, etc. Antamedia DHCP Server supports both 3GPP and IEEE standards. Features: Dynamic Provisioning With Antamedia DHCP Server you can create a whole new network or simply bridge a current network by configuring a new sub-net. It provides a user-friendly interface, and offers a lot of functions and rich configurations for you. Enterprise Integration Antamedia DHCP Server is designed to be integrated with ADSL routers or other IT infrastructure devices. It can turn the whole ADSL router into a DHCP server to serve the local network. You can also integrate ADSL router and Antamedia DHCP Server into a single unit. This will greatly enhance the network security, administration, and management. User Authentication Antamedia DHCP Server supports three kinds of authentication methods, including the traditional PAP method and two recent methods. With the traditional PAP method, you can add and edit users, and add additional user accounts with ease. You can authorize your users to log in to the Internet or an intranet, and more. User Manager Antamedia DHCP Server is the most advanced DHCP software, and has a much more powerful and flexible user management system. You can perform many functions for user management, and many more. User Access Control Antamedia DHCP Server supports four kinds of user access schemes. The default scheme is to allow everyone to login. In the second scheme, you can restrict each user to be able to access certain websites. For example, you can allow your company's employees to access Google, and prevent your customers from accessing Google. Security With Antamedia DHCP Server, you can enable or disable

What's New In?

The Antamedia DHCP Server software is a complete and advanced high quality solution, designed to work perfect in Internet Cafes, HotSpots and Hosting Centers. Interface with: The program is fully compatible with all the major brands of Windows Server operating systems, NetVista, XP, 2000, NT, 2003, Vista, 7. It supports both 32-bit and 64-bit. The program can be used also on Windows Mobile and Zune. High-quality and fast, the Antamedia DHCP server will help your business to be more efficient. The Antamedia software is a reliable, efficient and most suitable system for Hosting Centers and Internet Cafes. Reads the parameters defined on Microsoft DHCP server, and creates a complete configuration file, optionally, it can be deployed by Microsoft in the subnet. DHCP server parameters to be configured, both the options specified, and the number of servers in the range can be defined. This DHCP server is composed of three parts: a database component, a connection component and a configuration component. The database component is for storing client DHCP options set, and the connection component is used to communicate with the DHCP servers in the subnet. The configuration component is used to configure the options using the database component and controls the connection component.The configuration component is the best option if you want to use the simple DHCP server.The software is also able to integrate with other third-party hotfixes and automation programs.
