What's New In?

Musoftware Youtube Downloader is a small-sized and portable software application that can download YouTube clips and save them to your hard drive, as the name implies. It

does not comprise complicated options or configuration parameters, so anyone can tinker with it, regardless of previous experience with computer software. As installation is not a prerequisite, you can drop the executable file to any location on the hard disk

and just click it to run. There is also the possibility of saving Musoftware Youtube Downloader to a USB flash disk or similar storage unit, in order to run it on any PC with minimum effort and without previously installing anything. An important aspect worth

considering is that the app does not create new entries in the Windows registry or Start menu, leaving the disk clean after removal. The interface is represented by a regular window with a minimalistic layout, where the "what you see is what you get" principle clearly

applies, as there are no other options available, aside from what's shown in the main frame. All you have to do is copy a YouTube link and paste it in Musoftware Youtube Downloader's dedicated box. The tool supports Clipboard live monitoring. Once the output

directory is specified, you can start the download. The app does not put a strain on computer performance, as it uses low CPU and RAM. It executes a command rapidly and downloads videos pretty quickly. However, it failed to fetch some clips during our

evaluation. All in all,
Musoftware Youtube
Downloader serves its purpose
and is generally stable.
However, the tool comes with
limited features. Users may
resort to other similar tools that
offer more options.
