views:104245 Plot: Two brothers, Alexander and Kyle, suffer from acute telekinetic powers. They spend the first part of the film playing a harmless prank on their neighbour, Mr. Bergman, before they are exiled to an alien planet called Teleportia due to their gifts turning into malevolent powers. They must acquire books from the castle library, which has a mystical seal over it, to change their fate. Plot: A mysterious plant germinates on a rural estate in the evening, when its owner is away on business. The plants, which possess extraordinary vitality, soon show a strong attraction to an old man, Solomon, who happens to pass by the garden that evening. This man, suspicious of his surroundings, contacts his old friend, Ralph Miller, about his strangely mysterious problem, while at the same time attempting to make sense of his own life, and the relationship he has with his wife, Lucia. Definition: Rapidly and perhaps abruptly changing from calm to frantic; excited; alarmed; beset by a lot of people in a crowd; being crowded; to cause violent crowd movement (comprising a whole moving toward a goal and moving out). They have everyone in here, rushing for the exits as quickly as they

On Nov. 12, a 26-year-old woman was struck and killed while crossing a street in the Prospect Heights neighborhood of Southeast Anchorage. She died at a hospital, and her fiancée was not hurt. This Friday's hit-and-run occurred around 5 p.m. in the 6400 block of 3rd Avenue Southeast. According to police, a pickup truck was driving east on 64th Avenue and ran a stop sign at the intersection of 64th and 3rd. The driver got out of the truck and fled the scene on foot. The victim had minor cuts to her face. She was taken to a local hospital by a friend, and was later transferred to St. Mary's Hospital. She was pronounced dead Friday. Police are asking for any witnesses or anyone with video of the crash or the driver to contact APD at 907-644-8109. Want to inspire people to live healthier lives? The article gives more background on the 4 major neglected viral diseases. In 2014, after a decade of increased concern about the neglected diseases, there are still more than 300 million people around the world suffering from one or more of them. Success in tackling neglected diseases depends on sustained research and technology development, and collaboration is a critical component of both endeavors. Even as the best new medicines and technologies are developed, neglected diseases will not disappear on their own. Changes in the social environment, such as increasing migration or urbanization, increase disease rates and make control more difficult. Communication and public education about health and disease also increases in areas lacking a physician. "These diseases are most often not the enemy of a few isolated nations. Rather they are the enemy of everyone. Period."

Fitzgerald: Message to Nicki Minaj, Britney Spears and Other Women Rejects Dorais "Da' Best" James, 51, opened up for his first time about his admiration for Nicki Minaj and Britney Spears. His pro-Nicki and Britney choice hasn't gone unnoticed. The music maverick presented what he calls his "message to women" on the radio show Da's Knocking on the Funk. "I admire Nicki Minaj for basically bringing females into the higher element of what they are capable of doing. I also admire Britney Spears because she is a role model to all girls and women. Britney Spears paved the way in terms of the way that women are presented as an artist. "My message is for females to realize that there is a way out of the system if you know what you're capable of. Don't give up. Believe in yourself. Let's try to be the boss." Aww, Da' Best, someone should tell that to Nicki. Given the fairly short length of time she's made music, there's no time for her to earn millions and millions in the music biz. Though Nicki is aggressive and outspoken to a point some may find offensive, she's also a force and good for the young female who may need a better example.

Fungal keratitis: A review of the literature. Viral keratitis (VK), primarily adenoviral keratitis, causes a significant number of corneal infections, and UV irradiation of the cornea is the most common cause of viral infection. With increasing evidence that fungi may be the leading cause of fungal keratitis, we conducted a computer-aided search of the English language literature, pubmed and MEDLINE for fungi-associated human infections to gain an understanding of the epidemiology, pathology and treatment of fungal keratitis (FK). The proportion of fungi causing FK has increased in recent decades. Many Keratitis experts predict that fungal keratitis may soon be recognized by microbiologists as an important infectious disorder. The epidemiology of fungal keratitis varies among countries and regions of a given country, as
