The galaxy is big, but you can explore all of it with a click of your mouse. Travel to any part of the cosmos with a click of the mouse. The sun is yours to experience as you orbit it, and the Moon as you orbit the Earth. Travel to the planets, from Mercury to Neptune, and from Earth orbit to trans-Neptunian space. Travel to the stars, traverse interstellar space and visit the dwarf planets. Explore the Sun and Moon in orbit around the Earth, and in Earth orbit around the Sun. Travel between Earth and the Moon, watch the phases, and notice the rise and fall of the Moon's shadow. Experience lunar eclipses, meteor showers, and other phenomena. Explore the Solar System, using your mouse to zoom and view every planet, moon, and other celestial body in unprecedented detail. Jump into the unknown: explore interstellar space, fly to any world you wish, visit any object in the Solar System. Fight gravity and accelerate time to watch the orbital motions of thousands of planets before your eyes, and visit any point in space. It's all up to you. SpaceEngine features a stable and accurate simulation of Newtonian physics, including the unit of time, unit of distance, unit of velocity, inverse-square law of gravity, Kepler's laws, restricted three-body laws, and all relativity-related phenomena and effects. Light warping (or "warping" as it is called in SpaceEngine parlance) is an astrophysical phenomenon whereby objects travelling at relativistic velocities experience time dilation and distance contraction. The most well known example of light warping is when astronauts travel into outer space to visit a black hole. In the example of an astronaut traveling into a black hole, near the event horizon, the expansion of space would cause the astronaut's clock to slow down as it approaches the event horizon. Near the end of the journey, as the astronaut approaches the event horizon, the time dilation causes the astronaut to undergo many years of accelerated time while passing through this field of intense gravity. SpaceEngine is a 1:1 scale Universe simulator, with billions upon billions of galaxies, nebulae, stars, and planets, all shown at their full real-world scale. The entire universe is yours to explore - cruise between the stars at a million times the speed of light, and accelerate time to watch the orbital motions of a thousand worlds play out before your eyes. All of time and space are yours to explore -

Children of the cloud are part of the game's ecosystem, living in a multi-user world where players interact with each other. Players can freely change everything about their character, and they can even store and edit their data, if they so choose to. However, players are not allowed to share data with other users of the game unless their character is owned by the other player. Children of the cloud is a turn-based game, where the world is represented in easy-to-follow steps, but several details can be customized, including dice weight and the time between turns, and users can modify the game's rules as they see fit. The game can be played with up to three players, and contains multiple maps. Customization: Children of the cloud is a persistent game with a large variety of customization features. Players can shape their character, customize their map layout and color the game's interface to their liking. All of these customizations are stored in-game and remain unchanging, and will only affect the game upon being reloaded. Additionally, there are two story-paths available, which affect a character's appearance upon her character class's birth. Game Variants: Children of the cloud is fully customizable, and it is possible to create unlimited game variants. This enables players to create their own gameplay experience by altering the ruleset and customizing aspects of the game such as the starting map layout or window size. It is also possible to change the match-making algorithm to provide more meaningful interactions between players, or to even alter the rulebook. This is very important because players can easily adapt the game to their liking, and it allows them to play at their own pace and with minimal frustration. Story path: The game takes place in a world where creatures of all shapes and sizes share one planet. Each inhabitant of the planet can choose to have a similar experience and grow up

together in a safe and secure environment, or they can grow up solitary and alone. The latter path usually leads to a life of crime, like a violent street gang, or working in a lifeboat as a member of an illegal smuggling business, and this later situation can be related to the player character's location in the world. The game is set in a time and place that was not entirely free of environmental disasters, and the purpose of the game is to help the "children" to grow up as dignified beings in a land of law and order. Beginning Map: The game begins on a regular map c9d1549cdd

Earth Defense Force 2 (EDF2) combines high-flying action and strategically challenging ground combat in an epic scale. For the first time in history, the Earth Defense Force is not alone in the defense of mankind. In addition to their classic battle armor, the Earth Defense Force has taken to the sky. Flying, hovering, and wall-climbing, they combat the alien invader in a truly dynamic environment. Each new mission and new enemy forces players to adapt to the changing conditions of the battlefield. Earth Defense Force 2 takes place almost entirely on foot and in the air. It is relentless: ground battles are very intense, with only a 10 second time-to-kill. This makes the ground your best ally, and allows for complicated tactics. Plan your assault from start to finish and then get in and get the job done. Why Fly? EDF2 is the first game that introduces true flight, giving players the freedom to soar across the battlefield while raining fire on the enemies below. Maneuvering to avoid incoming rockets and lasers, players are flying back and forth across the battlefield while blasting away! It is not enough to just take down the enemy though; strategy is key to victory! The fly-able battlefield means you must keep enemies between you and your destination. A fast-moving group of enemies will quickly catch up to you if you don't think them through. Key Features: NEW - Fly the Earth Defense Force to victory! Up to 31 fully functional aircraft are available, and each grants its own strengths and weaknesses. NEW - Discover the Marauder's new fly-able vehicles! Try out the ground vehicles in fly-mode or modify them to fit your playstyle. NEW - A rich and varied arsenal: every soldier is equipped with the latest in battle armament. Every armament in the EDF arsenal has been upgraded and re-tuned for EDF2. 3 NEW NON-FLY AVATAR: The new Air Shark, Air Scorpion, and Air Wolf jet fighters. Slice and dice the enemy with the new Air Wolf, Air Scorpion, and Air Shark new jet fighters.
