Turn-based tactical combat. The enemy AI is phenomenal. Select how many of their soldiers to send forward as reinforcements. When you attack they come forward, when you move your guy is the one that gets shot. There's a lot of variety in the enemy's behavior, both in attack tactics and ability options. While there's no hero to watch, there is much of a variety in equipment and stats. Some weapons are capable of more damage than others. And there's a lot of variety in the abilities each unit has. For example, there's someone that's best at using the shotgun or grenade launcher, and another guy who works better with heavy melee weapons. When more than two units are on the field, also be aware that the enemy has certain abilities that may be useful for them. We have a very experienced community, and there's always someone who has figured out the best tactics. And we get a lot of feedback from players all over the world to improve the game further. All the feedback we get helps making the game even better. Give your troops the best equipment and weapons, and trust your intuition. It's the only one that will guide you through the battlefield and give you a feeling for what's going on. Experienced players have already figured out that some guns have better weapons attached. It's recommended to bring those as much as you can, because those attachments offer more protection from enemy fire. Also, you can attach a grenade launcher with an HE-grenade, and you can also attach a rocket launcher to the shotgun. If you have the expertise, you can even bring a regular weapon with a scope. When you have a hero that gets knocked down or a hero that is out of ammo you can still control his/her movement, use item drops, and attack the enemies. Those are also the times when your team is most vulnerable. The more players work together, the more effective they are. The soldiers in

your army can be equipped with good equipment or poor equipment. For example, a big shotgun loaded with high-damage shells will do more damage than a grenade launcher equipped with a few grenades, but it's not a good idea to go with shotguns with absolutely no aim. The important thing is to equip your troops with equipment that fits their role and give them the chance to survive. Be careful with this, though: if you have a poorly equipped soldier, he may die at a moment's notice. However, if you equip your soldiers with good equipment they will gain more experience, and the more experience they

### **What's new:**

**Astral Flux is an eight-issue comic book miniseries published by Marvel Comics from September 2006 to September 2007. It was written by James Robinson and illustrated by Nick Bradshaw. Issue #8 was co-written by Tim Marquitz and Dionysus and the issue #7 by Al Ewing and Mark Irwin. The series centers on four groups of characters, each a representation of the four elements, fighting for the fate of the Earth. Plot summary Eight months after defeating the Oni, the Coda has ascended to the outer planets to assemble the Infinity Watch. They returned to Earth, but soon engaged in a major battle against X-Corporation's Shiklah. In the aftermath of the battle, they discover that Earth is now governed by the humanoid Dirac. In what becomes the annual Armageddon Games, Dirac eradicates the Coda and, in the process, destroys Earth. The other four elements, in response, decide to steal the Pym Particles. The Guardians of the Cosmos respond to this theft and decide to combat the intruders, but they face a dozen of the four elements. Surprising the Guardians, the four elements abduct an Infinity Member and sacrifice**

him to the Cosmos. As the match reaches its climax, the deity Ori equips his already-armored form with the Infinity Ruby, a cosmic quantum computer which would allow him to directly manipulate and imitate the very fabric of space-time. Characters Infinity Watch As the Infinity Watch confronts their new adversaries in a battle fought across space and time, Agents Peter Quill (a.k.a. Star-Lord of the Kree) and Mantis encounter the new Adam Warlock, who offers them the opportunity to destroy the Coda as a demonstration of his power. They accept and they find themselves in the presence of an elderly man in what appears to be the middle of nowhere. After Quill invokes his authority as a member of the Infinity Watch, the man is revealed to be the lord Ori. Informed of the ongoing conflict, Ori warns the pair that the Coda are attempting to wipe out the combined powers of all Infinity members with a titanic Black Hole. The pair, who have been under the impression that the Coda still remained on Earth, agree to help arrest the invaders. Before they could leave, the young couple sacrifices themselves in the Coda's latest attack, and when no more Infinity members will step forward, Ori is forced to summon the energy that
