Bargs is a beat oriented electro/dance soundtrack for the Kenzinger series, the game described as "punk" by Mark Powell. The game takes place on an interstellar prison ship called jailBarge, a metaphor for the prison ships that kept people in for political and ideological crimes before the era of Exile. The main goal is to kill the evil governor, whose identity is not revealed until the closing moments of the game, keeping the players guessing. The original Kenzinger OST was composed by Tommy Baynen and published by Razorcake Records in 2009. The "arcade" tracks are full blown drum-n-bass inspired originals and are orchestrated with real arcade sounds and allusions to early video games. They were composed by Jason Carter, and were released on his Distortion album. In 2010, Spitfire Records released a limited edition version of the OST with 10 remixes and additional tracks by Tommy Baynen and Jason Carter.
