Switching of functional domains of the human rotavirus outer capsid protein VP4 by temperature. It is known that changes in temperature profoundly affect the properties of purified human rotavirus SA11. We have studied the effect of temperature on the conformation and immunogenicity of each antigenic domain of the outer capsid protein VP4 of human rotavirus SA11, which confers neutralization of this virus. We found that antigenicity of each domain of VP4 is different at lower and higher temperatures. The ability of these different domains to elicit neutralizing antibodies was affected differently by temperature. An antibody induced by a domain at low temperature also reacted with this domain at higher temperature. On the other hand, the antibody induced by another domain also reacted with this domain at lower temperature but not at higher temperature. These results indicate that the antigenic and neutralizing activity of each domain of VP4 can change at different temperatures. Content on this page requires a newer version of Adobe Flash Player. Protecting The Public, One County At A Time Comic Review: Tram Paramedic Tram Paramedic has seen better days. Acclaimed DC Comics writer Nicola Scott takes a look at the debut of our favorite tuba-playing ambulance technician. In the DC Universe there are a lot of memorable female superheroes. In fact, you could argue that there are a lot of memorable superheroes. Well, when it comes to rescue personnel and first-responder types, DC Comics loves to give those titles to the women. Tubastar has been around since the

dawn of time, isn't afraid to fly and loves to play her tuba. As an ambulance driver for the DC Emergency Services Unit, she saves countless lives and invariably earns herself a place in history. Tram Paramedic is the second female named paramedic to be revealed in the DC Comics after Erica Welles' Erica Storm and Transtar. Transtar, for the record, did not become a spokesperson for the human toilet company Transtar. (Although she does go by that alias quite often.) Nicola Scott is the author of the best-selling Eisner-nominated comic books Wonder Woman, Supergirl, Ragman and the critically acclaimed Trinity. She's also a former scriptwriter for the smash comedy series Family Guy. As a young girl, Nicola read anything she could get her hands on about history and science. She attended the University of Toronto, where she was active in theatre and journalism, before moving to Los Angeles where she worked as a feature editor for The Source Magazine.
