Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Vaccines are part of a larger push to protect children from infectious diseases around the world. In the U.S., for example, the Vaccines for Children program has granted protection to more than 5 million kids since its inception in 2001. In China, efforts to inoculate children have been viewed with suspicion by many parents. In Shanghai, some parents stopped their children from being vaccinated and they threatened others with legal action if their children were vaccinated. That fear was compounded by a new vaccination protocol introduced by Shanghai's government that required children's parents to sign a health declaration committing to vaccinate their children before they were administered the shot, according to The Associated Press. Parents who broke the rules could be held liable for ¥200,000 (more than \$25,000), according to The Associated Press. "I would be very sad if my child died because I didn't vaccinate him," said Li Liang, a mother in Shanghai's Songjiang district. Some parents also worried the push to
